October 2010

Dear Doctor:

The Immune Deficiency Foundation (IDF) is the national patient organization dedicated to improving the diagnosis, treatment and quality of life of persons with **Primary Immunodeficiency Disease** (PIDD) through advocacy, education and research.

In order to best serve our patient population, IDF has partnered with the United States Immunodeficiency Network (USIDNet), to offer educational grants to teaching hospitals across in the United States through the LeBien Visiting Professor Program. The purpose of this program is to foster improved knowledge about the diagnosis and treatment of patients with PIDD. The Visiting Professor can speak during Grand Rounds, and can serve as an addendum to your medical education program. Other relevant activities such as bedside rounds and house staff or medical student conferences may be included.

We are currently accepting Letters of Request for the IDF & USIDNet LeBien Visiting Professor Program, academic year 2011-2012. We hope that you will consider applying and believe your medical education program will benefit from having one of the leading clinical immunologists as your Visiting Professor.

If you are interested in participating in this exciting program, please send a brief (one page) letter to the attention of Diana Gill, IDF Director of Program Services at the address above or email [dgill@primaryimmune.org](mailto:dgill@primaryimmune.org) by **January 15, 2011**, stating your desire to participate in the program.

Please include the following:

- A tentative list of teaching/clinical activities for the Visiting Professor.
- How your training program and/or students would benefit from the Visiting Professorship

Please feel free to contact Diana Gill at 443.632.2545 if you have any questions. We look forward to hearing from you.

Sincerely,

Rebecca Buckley, MD  
Chair, IDF Medical Advisory Committee  
Duke University School of Medicine

Marcia Boyle  
President and Founder  
Immune Deficiency Foundation

Charlotte Cunningham-Rundles, MD, PhD  
PI, USIDNET  
Mount Sinai School of Medicine

Immune Deficiency Foundation is the national patient organization dedicated to improving the diagnosis, treatment and quality of life of patients with primary immunodeficiency diseases through advocacy, education and research.

USIDNET is funded by The National Institute of Allergy and Infectious Diseases (NIAID) and The National Institute of Child Health and Human Development (NICHD), which are components of the National Institutes of Health (NIH), an agency of the Department of Health and Human Services. NIAID supports research to advance the understanding of transplantation and to prevent, diagnose and treat infectious and immune-mediated illnesses. USIDNET administrative support is provided by Immune Deficiency Foundation.
