

Inflammatory Muscle Diseases

Antibodies	Prevalence in myositis	Comments
Jo-1 (anti-histidyl synthetase)	20-30%	More strongly associated with polymyositis than dermatomyositis
Mi-2	8%	15-20% of patients with dermatomyositis and generally correlates with greater dermatologic involvement
Histone	17%	
U1 sn RNP	12%	Often present in overlap syndromes with myositis
Ro	10%
